

# Github

Github

GitHub is a platform for hosting and managing code. It is a distributed version control system that allows developers to track changes to their code and collaborate with others. GitHub is a popular choice for developers because it is easy to use and has a large community of users. It also provides a variety of tools and services to help developers manage their code, such as pull requests, issues, and wikis. GitHub is also a great way to share your code with the world and get feedback from other developers.
